Education

VIT Bhopal University (8.97 CGPA)
Bachelor of Technology in Computer Science (Core)
DAV Public School (X: 91.4% XII: 84.4%)
Class IX – Class XII

Madhya Pradesh, India
Sept 2023 – July 2027
New Panvel, India
June 2019 – June 2023

Projects

- ApniTwacha: AI-Powered Skin Analysis** | *Python, TFLite, HTML/JS* | [Github](#) | [Demo](#) May 2026 – June 2026
- Built a skin-type detection platform trained on a 4,093-image dataset, deploying TFLite models via a serverless AWS architecture (Lambda, API Gateway, S3) for low-latency image inference.
 - Engineered a hybrid recommendation system combining traditional "Gharelu Nuskhe" and modern dermatological formulations to generate hyper-personalised skincare routines.
- Pneumonia Detection from Chest X-Rays** | *Python, Flask, TensorFlow/Keras* | [Github](#) Sept 2024 – Dec 2024
- Built the Flask backend for a team-developed pneumonia detection system, integrating a CNN model (trained by teammates) into a web application for real-time X-ray analysis.
 - Designed routes to handle image upload, preprocessing, and inference, rendering predictions via HTML templates for a dataset of 5,000+ chest X-ray images.
- CustemAI: Hyper-Personalized Marketing Engine** | *React.js, Tailwind* | [Github](#) | [Demo](#) June 2026 – July 2026
- Engineered a high-speed AI personalization platform using React.js and the Groq API (LLaMA 3.3 70B) to generate dynamic, multi-channel marketing payloads (Email, Push, Display) with millisecond latency.
 - Built predictive engagement scoring using Recharts and implemented micro-persona targeting, enabling the seamless export of structured JSON assets for integration into enterprise systems like Epsilon's COREai.

Achievements & Certifications

- Academic Excellence** – Achieved a 10 GPA in Semester 7, securing an 'S' grade in core CS fundamental subject Computer Network.
- Hackathon Finalist** – *InnovateZ 2026 Gen Z Challenge*: Ranked among the top **12 teams** out of 600+ registrations nationwide for **SupplyGuard**, an AI-powered Supplier Risk Monitoring platform. [Link](#)
- AWS Certified Solutions Architect** [Link](#)
- AWS Certified AI Practitioner** [Link](#)
- NPTEL Marketing Analytics** – Gold [Link](#)

Technical Skills

Programming Languages: Java, Python, MySQL, HTML, CSS, JavaScript
Frameworks & Libraries: TensorFlow, TFLite, Keras, FlaskAPI
Tools & Technologies: Github, LaTeX Overleaf, Docker, AWS
AWS Cloud: EC2, Lambda, ECR, S3, CloudFront, Queue, Load Balancing
Concepts: AI and Machine Learning, Data Structures and Algorithm, Proficiency in System Design, CI/CD Pipelines

Experience

- Volunteer Coordinator, PAT Volunteer** Oct 2024
Cognizant Campus Drive Madhya Pradesh, India
- Selected among the top 16 out of 423 applicants to manage student flow and operations during the Cognizant placement drive.
 - Enhanced candidate onboarding and coordination workflows, significantly reducing scheduling errors by 30%.
- Event Team Member** Aug 2023 – Present
Cisco and OWASP Clubs Madhya Pradesh, India
- Organized and coordinated 5+ technical and cybersecurity workshops for over 180 total participants.
 - Facilitated events including Git and GitHub training and Live Hacking workshops to enhance practical student learning.
